

Application.UseCases.Professor.
GetProfessorById.ExecuteAsync

```
graph LR; A[Application.UseCases.Professor.  
GetProfessorById.ExecuteAsync] --> B[Application.Validation.Use  
CaseException.NotInformedParam]; B --> C[Application.Validation.Use  
CaseException.UseCaseException];
```

The diagram consists of three rectangular boxes arranged horizontally. The first box on the left is shaded gray and contains the text 'Application.UseCases.Professor.GetProfessorById.ExecuteAsync'. A blue arrow points from the right side of this box to the left side of the second box. The second box is white with a black border and contains the text 'Application.Validation.Use CaseException.NotInformedParam'. Another blue arrow points from the right side of the second box to the left side of the third box. The third box is also white with a black border and contains the text 'Application.Validation.Use CaseException.UseCaseException'.

Application.Validation.Use
CaseException.NotInformedParam

Application.Validation.Use
CaseException.UseCaseException
