

Application.Tests.UseCases.  
Area.CreateAreaTests.Execute  
\_WithValidInput\_ShouldCreateArea

```
graph LR; A["Application.Tests.UseCases.  
Area.CreateAreaTests.Execute  
_WithValidInput_ShouldCreateArea"] --> B["Application.Interfaces.Use  
Cases.Area.ICreateArea.ExecuteAsync"]; A --> C["Application.Tests.UseCases.  
Area.CreateAreaTests.MockValidArea"];
```

The diagram illustrates a dependency between a test method and its dependencies. A central box on the left, representing the test method, has two arrows pointing to boxes on the right. The top arrow points to an interface, and the bottom arrow points to a mock implementation.

Application.Interfaces.Use  
Cases.Area.ICreateArea.ExecuteAsync
