

Application.UseCases.Sub
Area.GetSubAreaById.ExecuteAsync

```
graph LR; A[Application.UseCases.SubArea.GetSubAreaById.ExecuteAsync] --> B[Application.Validation.UseCaseException.NotInformedParam]; B --> C[Application.Validation.UseCaseException.UseCaseException];
```

The diagram consists of three rectangular boxes arranged horizontally. The first box on the left is shaded gray and contains the text 'Application.UseCases.SubArea.GetSubAreaById.ExecuteAsync'. A blue arrow points from the right side of this box to the left side of the second box. The second box is white with a black border and contains the text 'Application.Validation.UseCaseException.NotInformedParam'. Another blue arrow points from the right side of the second box to the left side of the third box. The third box is also white with a black border and contains the text 'Application.Validation.UseCaseException.UseCaseException'.

Application.Validation.Use
CaseException.NotInformedParam

Application.Validation.Use
CaseException.UseCaseException
